

Questions to Experts

Dear Expert,

Following their Action Plan the Executive Committee of COTEC has installed a project group to write a ***Position paper on occupational therapy and primary care.***

This group (PP-OT-PC) will write a draft paper which will be sent out to you as experts for feedback in a later phase.

At the first COTEC ENOTHE joint congress in June 2016 in Galway, a workshop will be held to discuss the paper and gather feedback. The final Position Paper will be presented at the European Forum for Primary Care conference in Riga in September 2016.

The project group wants to incorporate best practices of Occupational Therapy in Primary Care in the position paper.

Could you please provide us with best practices of projects or OT-interventions and research findings which support the positive contribution of occupational therapy in primary care?

Format:*

Country

Name of the project and or intervention

Place and responsible organisation

Name and email address of the OT contact person

Dates start of the intervention

Short description of the project/intervention

Other disciplines involved

Aims of the project/intervention
