

EU Health Policy Platform

Currently, the third cycle of Thematic Networks is taking place at the EU Health Policy Platform. COTEC has experts in two of the three Networks: “Societal Impact of Pain” and “Smart Healthy Age-Friendly Environments” which will produce Joint Statements and a Call to Action each till November this year. Our experts took part in the webinars offered by the networks and have worked and commented on drafts of the documents mentioned. They are “quite convinced the final document is heading in the right direction”.

We are looking forward to these Joint Statements as they will cover issues important to Occupational Therapy practitioners all over Europe and hopefully help to improve our clients’ lives and Occupational Therapists’ working conditions alike.

There will be a final report published in one of the upcoming COTEC newsletters.
