

## Partnership with EUPHA: Public Health Week

As we announced in the last newsletter COTEC was very pleased to have signed a partnership with EUPHA (European Public Health Association).

During the WHO-Regional meeting president Stephanie Saenger and the Executive Director and staff member of EUPHA met again and discussed the cooperation.

EUPHA is planning a EUPHA Public Health week to attract attention for several Public Health issues. Every day of the week will have a different theme. One of the themes will be: **Injury prevention & safety promotion.**

Occupational Therapy will be involved in this week and this theme on both a European and a national level. Within this theme OT issues like fall prevention, safe mobility, safe living at home and labour conditions would be fitting. You will be contacted as soon as we have more information.
